

## FleetEngine

*Server solution for vehicle routing*

- Fleet management
- Field force planning
- Delivery / collection jobs
- School bus routing
- and much more

### **Features:**

- Multiple depots
- Multiple resources (vehicles)
- Multi-day planning
- Asymmetric distance and time matrix
- Job - resource match
- Service time
- Capacity: Weight, volume etc.
- Multiple time windows (such as 8-9 or 10-12)
- Avoiding U-turns en route (curb approach)
- Round trip
- Pickup or delivery

Release is planned for Q1 2010 (beta available)  
API will be similar to RW NetServer (the same clients)
